

NOTE ON THE CORRECTION OF LNG PRICE ASSESSMENTS AND BENCHMARKS

ACER's LNG price assessment and benchmark calculation process suffered technical problems. Consequently, the values calculated and published for the assessments **from 4th November to 9th December 2024** were inaccurate and thus have been corrected.

The cause of the problem were the transactions with delivery scheduled for next year (2025) that were included in these assessments. Due to the increase of such transactions in December, the impact and the correction applied are higher in the assessments of the first week of December than in those of November. However, in order to ensure maximum accuracy and transparency of the LNG price assessment and benchmark process, ACER has corrected **all** affected price assessments and recalculated the corresponding benchmarks. The new values and the daily report have been published in TERMINAL with a note message next to them.

The list of affected price assessments and corrected values can be found in Table 1.

Table 1 – Corrected LNG price assessment and benchmark values

MONTH	DATE	DAY	EU (EUR/MWh)			NWE (EUR/MWh)			SE (EUR/MWh)			LNG BENCHMARK
